

**In the specification:**

Please amend the fourth paragraph of page 15 the written description as indicated below. No new matter has been added.

***Amendment***

*The system would be also be functional if electrical solenoids operated by batteries were used instead of gas cylinders to brake the wheels. Using gas to brake the wheels is preferred in theatre applications, however, due to the fact that the gas system is clean, ~~quite~~, quiet, low cost and can be quickly recharged between performances.*
